**Subject: Fazon Lake Outlet Beaver Dam Removal – Whatcom Co.**

**ref: SEPA comments**

Dear Mr. Bob Zeigler:

Fazon Lake Services a boat rental & shooting range facility business for about 40yrs now located on Fazon Lake, Whatcom County is in favor of removing a beaver dam now restricting water flow from a manmade outlet on the northeast end of Fazon Lake. Our dock and launch facilities elevations were set years ago according to pre-dam average high/low water tables, and because of this beaver dam, water levels are now above these levels causing flooding over our boat launch, water over our docks, and water over our walkways on the shooting range. Launching boats has been challenging the last 2yrs now and maintenance to our facilities is very difficult. Please consider these SEPA comments in favor of removal including any future removal of dams and/or beavers.

Thank you for your dedication towards our wildlife resources.  
Sincerely,

Gail Harriman, owner
